

Registration and Orientation program for the new BTech students 2020

IIT Bhilai welcomes the new batch of BTech students!

As you might have already received the offer letter through JoSAA, the first step towards your enthralling academic journey at the campus is to register yourself as a student. The process of registration is scheduled on November 18, 2020. To make you familiar with the Institute rules, regulations and arena of available opportunities/activities, a four-day orientation program is being organized by the Institute, following the registration. Keeping in mind the COVID-19 advisories, the registration process and the trailing orientation program shall be held online.

It is **MANDATORY** for all the new students to be available for registration and the following orientation program. Your classes will start immediately after the orientation program. The classes will also be held **ONLINE**.

The detailed schedule of the orientation program and the academic calendar will be uploaded soon. Check the website and the email you registered with JoSAA frequently to get recent updates regarding your admission and further processes.
